

Stranix Collaboration Solutions: *Interwise Connect™*

Interwise Connect combines voice, Web and video conferencing in one product that enables you to provide unlimited conferencing and collaboration to everyone in your company for one fixed, affordable cost. Designed for the unique needs of mid- to large-sized enterprises, Interwise Connect differs from other conferencing products by delivering an enterprise-class application that transforms voice, Web and video conferencing from multiple point tools into one core communication product that can be given to everyone in your company, like email.

Unique Business Value

Interwise Connect transforms voice, Web and video conferencing from separate point applications used by only a small percentage of employees into a single, enterprise-wide communication tool that you can afford to give to everyone in the company, like email. This approach:

- Extends the proven cost savings and productivity benefits of conferencing to all employees in the company, not just a select few;
- Empowers innovation throughout the organization, enabling employees to create new ways to speed time to market, improve quality and strengthen customer relationships.

Multiple Conferencing Products In One

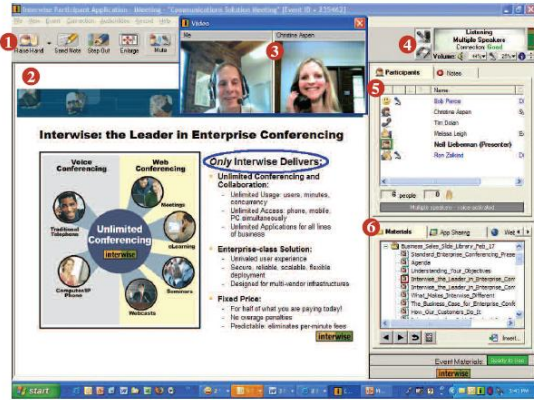

Interwise Connect integrates six conferencing capabilities into one product that meets all of your business needs:

- **Voice Conferences:** Enjoy full featured, stand-alone voice conferences without the per-minute charge! Pre-scheduled and reservation less. Network-grade security. Personal conference

room for every employee. Seamless escalation to Web meetings.

- **Web Meetings:** Launch unlimited numbers of online meetings for 2 people or 200 with one click. Share and collaborate applications and documents in real time with colleagues, customers, prospects or partners. Integrated audio (both TDM and VoIP) and multipoint video.
- **Virtual Training:** Lead or attend virtual classes with full moderator control and participant interaction features. Reach employees, channel partners and customers around the world for facilitated small-or-large-group learning, scheduled or just-in-time skills training, certification, etc.
- **Web Seminars:** Build awareness, generate leads and transfer knowledge internally and externally through low-cost, large-group presentations. Live video streaming, polling and other tools keep your audience engaged. Integrated recording lets you leverage the event even after it's over. Invite 20 or 2,000. No per-event fees or incremental charges for external (non-employee) participants.
- **Webcasts:** All-hands meetings, quarterly earnings calls and other large events have never been this easy or this economical. Set up integrated voice, Web, and video sessions in minutes from your desktop. No extra audio charges. No incremental costs for external participants.

- **On-demand Recordings:** Record live conferences, classes, meetings and events for those unable to attend. Pre-record subject matter experts to play during live events, for those times when they can't be in two places at once.

Unlimited Conferencing for One Fixed Price

Gartner considers conferencing a “birthright workplace tool” that is universally useful and should be deployed in some form to almost everyone in the enterprise.

Only Interwise offers a pricing model that allows you to do just that and more, for less than you pay for email. No per-minute charges. No overage penalties. No extra charges for collaborating with customers, partners, suppliers and other external participants. Just one simple, predictable price for as much conferencing as you need.

Enterprise-Class Solution

Over the past ten years, Interwise has developed industry-leading technology and architecture to make the vision of “Unlimited Conferencing” a reality. This innovation is designed specifically to meet the unique needs of mid- to large-sized companies. Interwise Connect meets their needs with:

- Enterprise-class scalability, reliability, and performance;
- Unparalleled bandwidth efficiency;
- Enterprise-grade security;
- Flexible deployment options;

- Advanced integration.
