Electronic Equipment Storage.

Storage Solutions as Smart as The Equipment They Protect.

CPU and specialized equipment is protected, secured and easily accessible with Xybix CPU storage including our unique TechTower and under work surface options.

Xybix ensures your equipment is easily accessible for quick maintenance. Combined with Xybix's cable management solutions, it's never been easier to maintain and manage your equipment, freeing you to manage other, larger technology-related matters.

Key Concepts / Benefits

Benefits

– Wide range of configurable CPU and electronic storage options for any requirement

– Protect equipment with better air circulation within storage units

– Exclusive TechTower maximizes vertical space for multiple CPUs and other electronic equipment

– Easy access to all CPU and electronic storage solutions avoids disrupting the individual user's productivity

Deep shelves with ventilation provide the core of Xybix equipment storage. Easy glide shelves and folding cable arms make maintaining the equipment and cabling quick and easy.

Form • Function • Health • Performance

Differentiators

⬣ **The Xybix Difference**
– Deeper storage cabinet depths for better air circulation and cable access
– Fans evacuate heated air away from users to maintain comfortable temperatures in the footwell
– Integrated construction with consoles provides consistent style
– Undersurface rackmounting options
– Easy cable access from raised floors, ceiling trays and walls into storage cabinets
– Full custom storage capabilities including custom millwork storage units and interior configurations

The folding cable arm keeps cabling secure and enables a full range of motion for the shelf.

Sliding shelves hold virtually any size CPU.

Built-in fans keep equipment cool, optimizing its performance and reducing heat in the workspace with ultra quiet operation.

Smart power access ensures quicker maintenance, and less cable clutter around the storage unit.

Features/Components

⬣ **CPU Storage & Tech Towers**
– Multiple preconfigured sizes
– Durable strong construction
– Coordinated finishes match workstations and/or building finishes
– Expansive depth for cable connections
– Sliding shelves for easy access for cable hookups
– Folding cable management arms eliminate tangled cables
– Standard ultra quiet two-fan design - 120 CFM
– Standard service light

⬣ **Rackmount Equipment**
– Ventilated design for increased airflow
– Variety of sizes and depths
– Undersurface mounting capabilities
– Meets EIA/TIA rackmount standards

⬣ **Easily mount patch panels and other electronic hubs/power supplies, for a complete pre-wired system.**
