

Dual-Surface Height Adjustable Furniture for Optimal Ergonomics.

ErgoPower Height Adjustable tables combine Xybix's attractive, durable, custom, Made-in-America craftsmanship with the precise ergonomic requirements defined in the ANSI/HFES 100-2007 Human Factors Engineering of Computer Workstations National Ergonomics Standard.

These dual-surface tables with advanced lifting columns, controlled by I-Fit software, deliver each individual optimal ergonomic benefit. Combined with our innovative cable management, storage, monitor mounting and desktop accessories, ErgoPower tables are the heart and soul of a complete ergonomic furniture system.

Key Concepts / Benefits

ANSI/HFES 100-2007 National Ergonomic Standard Compliance

- Achieve optimal sit-to-stand working postures in one system
- Height adjustment range from 5th-95th percentile of population

Stable-Durable-Modular

- Dual worksurfaces (keyboard & monitor)
- Automated, effortless, individualized adjustment
- Precise adjustments
- Flexible design accommodates a wide range of configurable options for monitors, electronic equipment and other key components

Standard, Configurable & Customized

- Pre-configured & tailored solutions for each unique environment

Integrated Cable Management

ErgoPower Consoles are at the heart of Xybix's complete ergonomic system. Combining configurability and customization, Xybix systems delivers a comprehensive solution to your needs.

Form • Function • Health • Performance

Differentiators

The Xybix Difference

- Meets all ANSI/HFES 100-2007 ergonomic guidelines
- Dual surfaces for greater strength, stability & durability
- Independent adjustments for monitor AND keyboard surfaces
- Open footwells for more user legroom and comfort
- Flush mounted hand controls for safety & durability
- Customization to exacting specifications
- Totally modular design for expansion and maintenance
- Environmentally friendly materials

Flexible Worksurface Configurations // // // //

Lifting Columns // // // //

Features/Components

Worksurfaces

- Material options
- Multiple pre-configured designs
- Custom designs
- Waterfall edging for durability and safety
- Wide range of color options

Digital Hand Controls // // // //

Lifting Columns

- Innovative, patent-pending lift system
- Precise range of motion
- Strong, durable, light aluminum materials
- Lifting capacity of 360 lbs for each surface
- Static load capacity of 500 lbs for each surface
- Advanced Collision Detection

DataDock // // // //

Base Structure

- Modular to fit custom sizes
- Durable steel construction
- Large under-desk footwell for extra legroom

Desktop Components/Enhancements

- Digital hand controls
- Computerized height adjustment display
- DataDock desktop data ports
- Integrated cable management
- Rollervision monitor mounting
