

## Modular Panel Systems.

Configured to Help Workers Get in the Productivity Zone and Stay There.

Concentration and flow are essential to your busy, mission critical environment. Xybix modular panel systems provide the noise reduction, sound absorption and space definition you need to enable maximum concentration for your valuable staff.

Panels are an integral part of our overall system, with integrated cable management, horizontal and vertical modularity, and an extensive variety of materials and finishes.

Xybix can configure panels to fit any dimension. Read on.

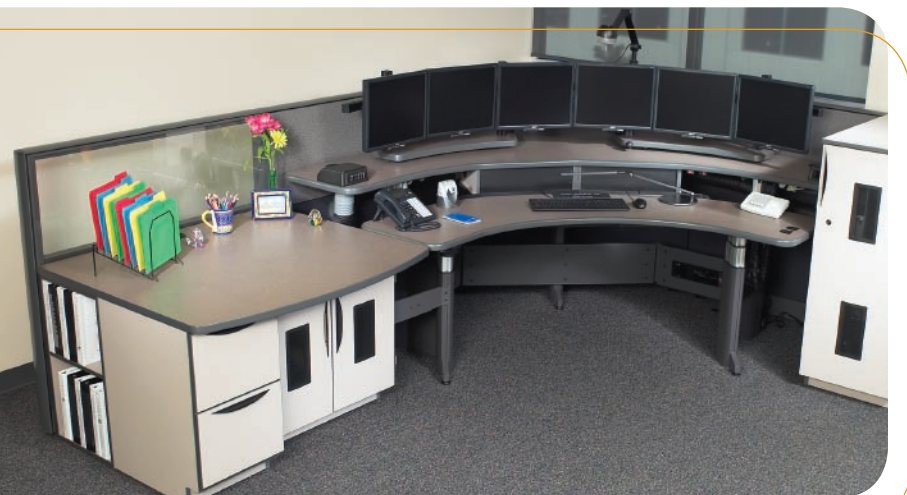

### Key Concepts / Benefits

#### Benefits

- Configurable system with horizontal & vertical modularity to meet any dimensional requirement
- Integrated within entire ergonomic furniture system
- Effective sound absorber/sound barrier
- Increases productivity by defining individual work area and providing vertical work space
- Defines circulation and traffic flow for performance and code compliance requirements
- Multiple tile options for any environment
- Noncombustible, class "A" flame-spread finishes

Configurable panels are built with the highest quality steel construction. Our custom systems fit virtually any space requirements.

Form • Function • Health • Performance

## Differentiators

### ● The Xybix Difference

- Horizontal & vertical modularity for true customization
- Flexible system for future moves, adds and changes
- Multiple tile options including whiteboard & safety glass
- Variety of top cap options including solid hardwood
- Meets ANSI/BIFMA X5.6-2003 performance standards
- Easily replace/swap out tiles, end caps and other components without disassembly

## Features/Components

### ● Strong, durable welded 14-gauge steel frame construction

- Connected with industrial grade 8mm steel bolts
- Non-combustible construction

### ● Top Cap Options

- Strong, light aluminum top caps
- Durable powdercoat paint finishes
- True solid hardwood top cap options

### ● Tile Options

- Tackable fabric, powdercoat steel airflow, laminate, whiteboard, safety glass
- Standard and custom fabric options

### ● Cable Raceways

- Integrated into all panel systems
- Easy, tool-free access
